# ePermits

## smart connected digital permits

DCA's ePermits permit issuing technology replaces the need for paper based permits for parking and other services. Our fully automated, highly customisable solution has been developed to meet the real-world needs of councils, universities and transport authorities where the complexity and rules based issuing of permits and bay reservations has become increasingly challenging and costly to administer.

Our innovative solution provides greater flexibility, and when used for parking increases equity and efficiency and allows our clients to meet the demands of rapid urbanisation. ePermits integrates with your website and allows permit applicants to easily and quickly apply for permits online with their smartphone or any web enabled device.

ePermits is fully integrated with the PinForce product suite and PayStay digital payment and way-finding application. Permit details are accessible via API to PinForce preventing infringements from being incorrectly issued to valid permit holders.

### FEATURES & BENEFITS FOR CLIENTS

Ability to fully automate eligibility criteria and approval

Significantly reduce administration burden and reduce the delays in permit application processing

Integration with PinForce enforcement suite for seamless accurate validations

Manages any parking permit type: Residential & ACROD, parking, special events, visitors, bus parking and more

Options for no tech, low tech and high tech customers ensure no member of the community is disadvantaged

Option to be operated by internal staff or outsource the full permit operation

Detailed accurate analytics on permits issued

### FEATURES & BENEFITS FOR END USERS

Greater flexibility to apply, renew and manage their permits

Quick, easy digital application

Fast, simple online updating of permit details such as a new registration number

Easily apply for electronic visitors permits via our user friendly smartphone app PayStay

ePermits protects against permit misuse, making parking more equitable for genuine permit holders
