# Australian Death Check

## Best practice data integrity

DCA's Australian Death Check is the most comprehensive and trustworthy method of identifying deceased contacts, with over 3 million government death records that are updated daily. As an Australian Government authorised data provider, we use the only official source of death data in Australia to expertly cleanse and verify your data.

### MITIGATE RISK & DRIVE EFFICIENCY

With DCA as your data partner, we will safely and securely cleanse your data according to industry best-practice standards. Connected to the Australian Death Check we will accurately match and flag exclusion data for deceased records and securely return the results in the exact format required for your system.

Designed to complement your existing data quality and governance efforts, our Australian Death Check check reduces operational and compliance risk. The service is highly scalable and cleanses your contact data against the only nationally recognised single source of truth. The result is data that can assist your organisation in adhering with privacy legislation, reducing costs, and protecting against unwanted publicity, fraud, and damage to your brand reputation.

We offer this service via API, or a secure batch file service using our own Australian cloud infrastructure to ensure data sovereignty. Utilising DCA's extensive consumer database we also offer additional data enhancement and identity verification, further improving data quality and matching.

### OUR EXPERIENCE IS YOUR ADVANTAGE

First and foremost we are experts in data. Our local knowledge together with our commitment to data quality is what sets us apart. With nearly three decades' experience, DCA will expertly customise a data driven solution to your exact requirements and business rules. Our experienced data professionals understand that no two strategies are the same, and they partner with you to understand your ongoing data requirements in order to maximise your success

We are a trusted data partner and are ahead of the curve in managing Information Security. Our in-house practices have been certified and accredited to the PCI-DSS Level 1 standard since 2013 and our principal data centre is certified to ISO27001. Our Australian based cloud hosting services are compliant with the AS/NZS 17799 Code of Practice for Information Security Management and have a geo-diverse back-up site.

## THE DCA DIFFERENCE

With nearly three decades' experience, DCA are leaders in data cleansing, migration and consolidation. Our business is built on having the best people, systems and solutions at hand for our clients.

We offer:

- Strategies that reduce risk of data loss or business disruption.
- Simplified processes that reduce the burden on your team.
- Cost efficient solutions.
- Quick and powerful implementation via our proprietary Nirvana software.
- Proven track record in delivering on time and on budget.
- Guaranteed high-quality data transformation.

## RECENT CASE STUDIES AND TESTIMONIALS
